[Instructor of electrical technology, KYLE LEBO, appears on screen in a classroom lab.]

### **KYLE LEBO:**

My name is Kyle Lebo. I work in the electrical technology department here at HACC. And why I think students should come here and take these courses. Are so that way they can go out and get a good paying job, learn how to take care of their own homes, and fix things around their houses, as well as further education throughout different trades.
