HACC information session at Franklin County Career and Technology Center

CHAMBERSBURG – Students considering employment as multi-skilled, electrical-mechanical maintenance technicians are invited to HACC’s information session for the college’s mechatronics program 4-6 p.m. Wednesday, July 15, at the Franklin County Career and Technology Center, 2463 Loop Road, Chambersburg.

Earlier this year HACC started its program in mechatronics – a high-demand technical field combining work with mechanical systems and electronic controls.

Prospective students at the information session can learn about program requirements, complete the enrollment process, speak with an academic adviser and find out about financial aid and payment options – all in one visit.

“Our small class size and lots of hands on learning are well received by both traditional age students and those who have been in the workforce and want to expand their job skills,” said Evelyn Weaver, HACC Franklin County coordinator at the Gettysburg Campus.

The classes begin in August and are scheduled during evening hours to accommodate the schedules of those who are currently working while they train for a career in mechatronics.

Prospective students can RSVP to Evelyn Weaver at the Gettysburg Campus, 385-2821 or esweaver@hacc.edu.
